Re: Albion-Sheridan Township Landfill ("Site")
RI/FS Good Faith Offer

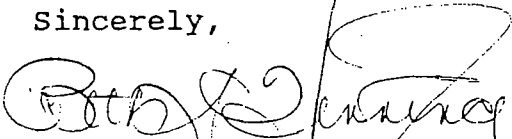

Dear Mrs. Stevick:

Please find this letter to notify you that the sixty (60) calendar days for the submission of a "good faith" proposal to the United States Environmental Protection Agency (U.S. EPA) to perform the RI/FS at the aforementioned Site runs on August 12, 1991. If the U.S. EPA is provided with a "good faith" offer, as defined in the June 3, 1991, Special Notice letter, the U.S. EPA will extend the moratorium in the commencement of RI/FS work an additional thirty (30) calendar days. The purpose of this additional time is to allow the PRPs and the Agency adequate time to finalize a settlement.

As previously mentioned in the U.S. EPA June 3, 1991, letter, we still encourage you to take steps to organize into a committee to negotiate an agreement with the U.S. EPA to conduct an RI/FS. To date, Mark J. Airola, of Cooper Industries, and Richard D. Geiger, of Corning, Inc., have taken leadership in attempting to put together a good faith proposal. U.S. EPA encourages the PRPs to contact Messrs. Cooper and Geiger to participate in the "good faith" offer discussions.

Please feel free to contact me at (312) 886-6831 should you have any questions regarding this matter.

Sincerely,

A handwritten signature in cursive script, appearing to read "Beth A. Henning".

Beth A. Henning
Assistant Regional Counsel
